

A Theory on Enchantments

What is it?

An Enchantment is a physical object that effects change in any and all forms. This object needs to be programmed or endowed with a specific purpose. This purpose is expressed through the shape of the object or an engraving onto it. Enchantments also require an observer or user to enact the change programmed upon them.

How does it work?

This program is stored in the Collective Unconscious. The Collective Unconscious is the spot where the mind connects with its entire species, similar to the idea of the Akashic Records; a hall of wisdom where all knowledge past and future exists. This altered state is where the mind of the user reaches the mind of the creator and enacts the purpose behind the enchantment. There is already a record of all symbols here and all you have to do is borrow one and borrow the power of all that have used it. There is always room for new entries in the Collective Unconscious, but you will probably stumble on a symbol that already exists and not know it. The Records are easier to access then you might think.

The catalyst

The symbol, ideogram, or mantra that you are looking to borrow needs to stand out. The idea is to catch the attention and keep a person wondering about it in the back of there mind. Mundane symbols will be skipped over or have been used so much in everyday life that they will not effect large changes in the mind. There is a great need for the mind to silently dwell on the symbol, that way the unconscious will take the time to recall it from the Collective Unconscious. Once its meaning is recalled the energy added to the symbol will help to reinforce the desired meaning behind its creation.

The vessel

The object that you wish to empower can be anything, even a piece of paper. It's a good idea to form the enchantment while in an emotional state close to the desire it's being made for. This emotional state enforces your intent while you place the symbol on the object. Short term enchantments, like "Bring me a Job" may become successful due to the ritual of creating the enchantment and not the enchantment itself. The success of a long term enchantment will depend on your choice of symbol and if you made your desires clear.

Afterthought

It would be a good idea to refresh your desire onto the enchantment from time to time. This reinforcement will help to keep it's energy high and allow for a more personal relationship with it. Be careful, over time enchantments can gain form outside of the object they were bound to. This can be a way of creating ghosts, imaginary friends and other thought forms.
